Data Notes

Table 1 references the number of recorded offenses made by the Everett Police Department in 2013. Under the rules of NIBRS, crimes are counted as incidents as offenses and by the count of victims. For this report, for Group A offenses the number of offenses was used as the count. As an example—if we took a report of an assault and there were 3 victims and 2 arrestees – the NIBRS data count would be: 1 incident of assault; 3 offenses of assault (since for crimes of violence you count the number of victims) and 2 arrests for assault.

Group B offenses are only reported if an arrest is made. Therefore the incident count for Group B offenses mirror the arrest count. Further, the Everett Police department did not arrest anyone under the age of 18 in 2013 for a Group B offense.
